BALANCED TOOLHOLDERS NOW AVAILABLE!

NEW ITEM!

SPIN-TRU TOOL HOLDERS:
BALANCED AS GOOD AS THE HIGH SPEED MACHINE SPINDLE @ g2.5

In North America, the convention is to balance to what is known as **ISO Quality Grade G2.5**. Briefly, this means the tool holder balance is consistent with the spindle as recommended by the International Organization for Standardization. **This is the best of class balanced tool holder.**

SpinTru's International Quality **AT3 Class** high RPM balanced Tool Holders are manufactured to the highest degree of technical excellence.

CAT and BT 40 taper end mill holders and collet chucks are **balanced to 20,000 RPM** to the much stringent g2.5 rating and not to the weaker standard of g5.3. Similarly, **CAT and BT 50** taper end mill holders and collet chucks are **balanced to 15,000 RPM** at g2.5 rating, matching the machine spindle ISO standard.
